The Wild Ones Yellow Pages lists our Wild Ones Business, Affiliate and Professional/Educator members. We showcase their special missions and talents to give our members, friends and the community the opportunity to get to know them as a resource in developing native landscaping. Whether they are a native plant nursery, an insurance company with native landscaping or a bed and breakfast surrounded by nature, we feature them in our Yellow Pages to show our appreciation for their support. When looking for products and services, remember that these members along with our Journal advertisers, share the goals and ideals of Wild Ones members. Go to www.wildones.org for more details.

 caboos@sbcglobal.net
Mountain Laurel Chapter

There is little doubt that invasive species are here to stay. Mystic Natives Horticultural Services is an ecological landscaping company that works to rebuild sustainable native habitats in the wild and in the built environments. Working with conservancies and landowners, we achieve this by using proven methods for removing invasive plant species in an environmentally sensitive manner, and following up with vigorous replanting of natives. In wild settings, this often involves removal of large infestations, while retaining native species already present and replanting with appropriate species. In the built environment, this often involves removal of monoculture lawns, or removal of invasive trees and shrubs, followed by design and replanting with native plants to achieve the overall landscaping goal in an ecologically sustainable way. We design, install and maintain biologically diverse low-mow lawn alternatives, native grass meadows, wildflower/pollinator gardens, rain gardens, build or enhance shrubby plantings. We custom grow many of the plants we use in our projects from locally sourced native seeds and offer a small number of these when available. Contact us for an availability list for coastal SE New England native grass, flower shrub and tree species.

Northern Kane County Chapter

Midwest Groundcovers LLC has been supplying the green industry with high quality plants, including a broad selection of Midwest regional natives, for 44 years. In 2011, The Natural Garden nursery joined Midwest, adding over 240 species of local ecotype natives to our selection. The name Natural Garden Natives® ensures the plants have been propagated from stock beds that were established with ethically collected material from within 90 miles of St. Charles. Natural Garden Natives® are excellent for sustainable plantings and the restoration of private and public areas. Home gardeners in the central Midwest can now find local ecotype natives at independent garden centers under the brand name of Natural Garden Natives®. Midwest Groundcovers is an industry leader in sustainable nursery practices.

Chicagoland Native Plant Source. Here at Natural Communities, we sell native plants and educate the general public to the vast human benefits of native gardens in their yards. We enable the public to purchase a diverse selection of native plants in practicable quantities and prices, from an individual plant to whole flats. We do this by bringing native plants sales to the people, through local and through e-Sales. We also enable the public to plant native gardens through an education/consultation process so that you get the best native garden possible. Nick Fuller, our owner and Principal Ecologist, has been involved in the sustainable industry for over 16 years in the Chicagoland area. He has worked on every scale, from the sale of a single plant to multi-million dollar projects. We can help you with any native need. Our Vision is a native garden in every home.

Wildtype exclusively grows plants native to Michigan, from Michigan genotypes. We grow trees, shrubs, grasses, wildflowers and emergent wetland plants typical of Michigan woodlands, wetlands and prairies. It is our objective to propagate nursery stock with enough genetic diversity to create self-sustaining populations. Therefore, the vast majority of our plants are grown from wild seed stock. This is what we mean when we say our plants are borne to be wild. Wildtype also provides ecological design & consulting services for public, commercial and residential projects focusing on restoration and preservation of native landscape.

Services offered include: species inventory and site assessment; design and planning; and the establishment and management of native landscape. Please contact us for more information.

Twin Cities Chapter

Based in St Paul, EnergyScapes has been designing, installing, and maintaining beautiful sustainable landscapes using locally native plant species since 1989. Our goal is to create places of sanctuary and oasis for people that also benefit our environment. Working with the site, we capitalize on the natural energy available from the earth, sun, and water to create landscapes that emulate natural habitats, save resources, and solve drainage issues, all while meeting our clients’ desire for beauty. EnergyScapes creates serene, energy-saving designs featuring elements such as Green Awnings® and rain gardens. Sharing the mission of expanding awareness, saving biodiversity, and healing the planet, we are glad to be working with Wild Ones. Douglass helped kick off the Twin Cities chapter by giving its first presentation, and he spoke at the Wild Ones’ Design with Nature Conference in February 2014. Douglass’s new book about how to create your own native plant landscape, Beautifully Sustainable, was released in 2014.

Habitat Gardening in Central New York

Amanda’s Garden Native Perennial Nursery specializes in propagating and growing native perennial wildflowers, ferns, grasses and sedges. Since our inception in 1991, our mission has been to preserve and promote native habitat by creating high quality, healthy native plants. We strive not only to create sustainable habitats, but also to meet the unique needs of our customers. We grow over 150 kinds of native perennials, mostly from seeds or spores which are harvested from plants native to the Northeast and specifically grown for propagation. You can visit them! While at our nursery in Springwater you can enjoy garden tours and hands-on demonstrations.

During your visit you can pick up plants in person. We also ship our plants to addresses in the Northeastern US. Plants are shipped only bare-root and dormant. You can order online from our website or by phone, email or mail order. We can help with plant selection and provide technical assistance as your garden develops. Planting wildflowers and native plants is an ecologically sound practice that allows even the weekend gardener to make a significant contribution to the quality of our shared environment.

Habitat Gardening in Central New York Chapter

The Plantsmen Nursery is New York State’s largest retail grower and propagator of native plants from local seed source. We collect seed of native herbaceous and woody plants—perennials, grasses, vines, shrubs and trees—from habitats in our Finger Lakes Region, and some surrounding areas such as The Adirondacks. We grow native species in various sizes depending on the customer and the need, from plugs to 20-gallon containers. We also source native ferns from a regional NY nursery specializing in fern propagation from spores, and grow them in larger size containers for retail and landscape sales. Our native plants are used on our own landscape projects, and are sold in our retail nursery. We contract grow on occasion.

Partner-at-Large

Ernst Conservation Seeds grows, processes and sells over 400 species of native and naturalized seeds and live plant materials for restoration, beautification, reclamation and conservation. Natives are critical in the restoration of North American ecological health, and are the best choice for use in almost every scenario. Ernst identifies, collects and propagates new species and ecotypes that meet its clients’ needs, from eastern Canada to the southeastern United States. The company’s native seeds are produced from species considered the most significant foundation of an effective native restoration or reclamation project. To ensure quality, seeds are harvested, conditioned and tested under the highest standards.

Ernst knows how to harvest native seeds and grow them in a production environment. The company helps its customers replicate that success in their own applications. This steadfast commitment to understanding its customers’ needs and advising them of the best solutions has been the cornerstone of Ernst Seeds’ business since 1964.

Our 1853 farmstead on the Crystal River in the historic Village of Rural exudes country charm on “Rustic Road 23” four miles south of Waupaca in Central Wisconsin. As Wild Ones members, we are committed to making as gentle an impact on the Earth as possible and to restore native plant communities and wildlife habitat on our eleven acres. We are “Travel Green Wisconsin” certified and began prairie restoration in 2010 and continue with invasives removal on this former farm. The Inn features seven guest rooms with antique furnishings, a view of the river or woods, and a nook for reading or visiting, and two cabins for families. Two rooms also have a double whirlpool. All include a full breakfast with a Southern touch featuring our homemade local wild grape and wild plum jelly. Our eggs, bacon, pork and maple syrup come from the Riley Crest organic farm. We use Wisconsin organic wheat milled at Lonesome Stone Mill. Many of the vegetables come from our garden. We serve fair trade and organic coffee exclusively. Our non-smoking environment has free high-speed wireless Internet, meeting space for small groups and we’re open year ‘round. Our land has paths through fields and woods and an outdoor, seven circuit classical labyrinth and seven monitored bluebird houses. The wide variety of habitat on our land and the area from tamarack swamps to hardwood uplands invites local wildlife like river otter, bald eagle and Karner Blue butterfly. The area offers many restaurants and recreation opportunities: biking, birding, boating, canoeing, walking, fishing, nearby State Parks and charming small towns. A Rural Wisconsin Treasure!
Many of these we propagate from seed, with an emphasis on Door County natives. Demonstration gardens, including a certified Monarch Butterfly Waystation, provide the opportunity for you to see, experience and learn about the plants we grow and how to use them in your garden and landscape. Our knowledgeable staff is eager to assist you.

Kettle Moraine Chapter

Dare Ecosystem Management specializes in natural area consultation, ecological restoration, invasive species control, native landscape plantings and design, prescribed fire, animal and plant inventories/monitoring, and more. Their focus is natural area management and consulting for clients interested in maintaining and improving the integrity of their conservation areas. Our experience ranges from working for not for profit organization on large nature preserves, to private clients with small backyard prairies and native plantings. No matter how large or small the project, we are committed to allocating the proper amount of time, consideration and resources. We focus our service area in Southeast Wisconsin from the Illinois line to Door County.

Door County Chapter

Door Landscape & Nursery provides sustainable, ecologically-based landscape design, installation, consulting, landscape care, stewardship planning and invasive species control services throughout Wisconsin’s Door County peninsula. Our goal is to exceed our clients’ expectations, incorporating their functional needs and aesthetic and personal values within the design of their landscape to restore or enhance its biodiversity and sustainability. This provides a dynamic landscape that attracts wildlife, is more stable and reduces the long-term cost of landscape care and property ownership. We create for you a beautiful outdoor environment full of year-round interest and enjoyment. The retail nursery is open 9am – 4 pm daily, May through October. We offer over 175 native plants of local and regional ecotype.

Madison Chapter

Formecology, LLC is a full service landscape design, installation, and care firm focusing on regionally inspired and sustainable outdoor living environments for residential and commercial settings. “Formecology” is born from the idea of combining art with nature: bringing natural elements together with cultural art forms to create landscapes that are appropriate both to nature and site architecture. Our training and experience in landscape architecture helps us to create a thoughtful vision that artistically integrates native plants and local materials in an inherently eco-friendly way. Outdoor living environments designed, installed and maintained by Formecology, LLC provide a sustainable and rewarding outdoor lifestyle.

Good Oak Ecological Services
205 Walter St
Madison, WI 53714
(608) 209-0607
info@goodoak.com
www.goodoak.com
Madison Chapter

At Good Oak Ecological Services our mission is to improve the environment for the benefit of people and the natural community. We are experts in native plants and the ecology of natural areas and we use this knowledge to create beautiful native landscapes and restore natural areas to a more pristine condition. Our primary background is in natural areas restoration, a discipline in which we work to rehabilitate damaged ecosystems so these wonderful places and the wildlife that live in them can thrive and be enjoyed far into the future. But these remaining natural areas alone are too small and too fragmented to provide enough habitat for our wild plants and animals. Our cities and towns are sterile, with heavily manicured shrubs, high-maintenance annuals and perennials and chemically dependent lawns. By working with us to integrate native plants into our human landscape we can enliven your home, business, and community while giving our wild plants, butterflies, birds and other wildlife a place to live.

Green Bay Chapter

NES Ecological Services is a committed group of ecologists whose diverse backgrounds include restoration ecology, wildlife management, and wetland ecology. Located in Green Bay and Madison, NES serves clients throughout Wisconsin and the upper Midwest. Since 1996, we have provided native habitat restoration services to municipalities, lake management districts and associations, the WDNR, the USFWS, and individual landowners. These services include planning and design, material installation, monitoring and maintenance. NES ecologists use their knowledge and experience with Wisconsin’s native plant community types to design and implement aesthetically pleasing, natural landscapes that utilize plant species native to the site’s region. Each restoration project is catered to the individual or group based upon their needs, experience, and desire to be involved with the “hands-on” portion of the project. Visit our website to review a few of our most recent projects along with a complete list of all the services we offer.

**Northern Native Plantscapes**
25350 S Garden Ave
Cable, WI 54821
(715) 794-2548
florabee@hotmail.com
Partner-at-Large

Northern Native Plantscapes specializes in shoreline and woodland restoration, stormwater management or raingardens, new home construction landscaping and perennial beds using native plants. Northern Native Plantscapes offers consultation, design, installation and maintenance services. Turning a lake owner’s shoreline from pure green lawn to a buffer of native plants not only helps wildlife, but also benefits the owner by providing a privacy and noise buffer. Our goal is to create an ecologically healthy landscape while meeting the needs of the home owners.

**Northern Sunset Perennials**
(262) 253-1412
www.northernsonset.com
Menomonee River Area Chapter

The Northern Sunset brand consists of over 1300 varieties of perennials, including over 200 Wisconsin and Midwest native species of perennial forbs, ferns and grasses. Look for the “NATIVE, Naturally!” logo on the tag. Northern Sunset plants are available at many fine retailers in Southeast Wisconsin and Northern Illinois. Find a retailer near you; learn more about our products, or our Colors of Success labeling system, by visiting our website. At Northern Sunset Perennials, we believe in the power of native species for diversity, reliability, and beauty.

Greater Cincinnati Chapter

The Civic Garden Center is a non-profit horticultural resource dedicated to “building community through gardening, education and environmental stewardship”. It is an oasis in the city - eight beautifully landscaped acres open daily to visitors at no charge and located 2.5 miles from downtown Cincinnati. Volunteers donate their time to maintain the grounds, and they and others provide financial support to
the organization that was founded in 1942. Our cornerstone program - Community Gardens touch 23 communities with over 47 active gardens. Compost Kids and Summer Sprouts programs introduce young people to gardening. The newly dedicated Green Learning Station teaches homeowners, students and business owners how to keep rain where it falls, how to garden anywhere and everywhere and how to recycle and compost.

The Civic Garden Center provides education and information to individuals, schools, organizations and businesses through its Horticulture Helpline, library, classes, hands-on workshops, tours, special events and outreach programs. Visit the Civic Garden Center, Monday through Saturday from 9:00am - 4:00pm.

Fox Valley Area Chapter

Beautifully situated on 1,000 acres along the shores of Wisconsin’s deepest inland lake, Green Lake Conference Center is a premier Christian conference and leadership training center. We also host retreats and conferences for other groups and are a favorite destination for family reunions and vacations. We are proud of our 57 acre native prairie known as Dawson Prairie which was completed in 2001. The prairie is ideally located between our camping areas, youth center and historic 1850’s homestead log cabin. In addition to the groups who use and enjoy Dawson Prairie on a casual basis, many area schools and community organizations have made it a supporting part of their curriculum. Through day visits and consecutive sessions, the Prairie serves as a living classroom in environmental education. We hope to increase this use through our alliance with Wild Ones.

Heckrodt Wetland Reserve includes 76 acres of forested wetland, wetland meadow, open water, and upland field communities. The wheelchair & stroller-friendly 3+ mile trail system includes a boardwalk that allows access to the wetland without getting wet feet. Facilities include a nature center with indoor living wetland and live reptiles, amphibians, and fish, as well as mounted specimens of Wisconsin mammals and bird species. Educational programs are provided for schools, daycares, special focus groups, and the general public. Our goal is to provide visitor education while fostering an ethic of environmental stewardship in a fun, hands-on atmosphere. Information about the Reserve and its programs can be found at our website at www.heckrodtwetland.org.

Ann Arbor Chapter

Now in it’s 26th year, Blossom Home Preschool & Adventures focuses on the natural world as its curriculum. Adopting part of Malletts Creek in 1992 in order to be good stewards of our local waterway, learning about and developing an appreciation for native plants became a central focus. The Burl Park Children’s Wet Meadow Project grew out of the children’s concern for and understanding of ecosystem functions. Since the initiation of the project in 1996, three meadows and a number of other features have been created in the park. They infiltrate stormwater and provide a habitat for native plants and numerous insects and other critters, an outdoor classroom for people of all ages, and an opportunity for neighbors, friends and other community members to come together in stewardship activities. All are welcome to the annual prescribed burn, an annual community event each spring. For more info: http://www.wetmeadow.org/ Our gratitude to Wild Ones for providing the first grant this project received.

Twin Cities Chapter

Heidi’s Lifestyle Gardens is proud to partner with our community to provide sustainable landscape design and installation, year-round landscape maintenance and garden management services. Our specialists create outdoor living experiences that are customized, offer simplicity, the beauty of nature, and are organic upon request. Our horticulturists are passionate about sharing the experience and benefits of connecting with nature. We lead by example, and teach everyone how to be good stewards of the land. There really is goodness in gardening. Our mission:

• To enhance the lifestyles of our clients by creating beautiful sustainable environments
• To provide a culture of growth and opportunity for our team of horticulturists
• To connect with our community through therapeutic and cooperative events

Greater Cincinnati Chapter

In southwest Ohio, over 90% of the original forest cover is gone. Few natural areas
remain. Those that can be found are fragmented, suffer from a lack of native biodiversity, and may be over-run with invasive species such as shrub honeysuckle. Songbird Environmental LLC was created to help private landowners protect, enhance, and even develop from scratch the native plant communities and trees that were once part of the great eastern wilderness. We offer our customers three broad areas of service that are comprised of: 1.) Native Habitat Development that is centered on serving small parcels of land from several dozen acres to a small backyard. 2.) Aboriculture that is focused on protecting the valuable trees that may populate your residence. 3.) Small woodlot management consultation and planning that may accomplish one or more goals of sustainable timber production, a more diverse forest, and greater aesthetic pleasure.

Applied Ecological Services (AES) is one of the leading ecological consulting and contracting firms in the world – providing restoration services for foundations, governmental units, corporations, and commercial/residential developers worldwide. AES applies science to provide practical land-use solutions that strike the most favorable balance between cultural needs, cost efficiencies and ecological sustainability. Taylor Creek Restoration Nurseries is AES’ flagship nursery - supplying 500+ native species, including the four distinct genotypes of the southern Wisconsin/northern Illinois area: Chicago Area Native Heritage™, Driftless Area Native Heritage™, Military Ridge Native Heritage™, and Sugar River Native Heritage™. Contact: Matt Kocourek. Hours: 8am-4:30 M-F, Saturday by appointment. Email: info@appliedeco.com

Milwaukee Southwest/Wehr Chapter

Since 1850, Milwaukee has grown in an uncertain world of wars, victories, tragedies and triumphs. But throughout decades of changing times, area citizens and dignitaries have always shared a comforting constant: the unparalleled dignity of eternal rest at Forest Home Cemetery. Today, Forest Home remains unchanged as a non-profit organization held in the public trust. It’s unique combination of modern and traditional is typified in its Chapel Gardens and spacious grounds.
